FOR IMMEDIATE RELEASE

### **MOSS IN CANALS CAUSES SERVICE INTERRUPTIONS**

June 30, 2010 - [Kennewick, WA] - The Kennewick Irrigation District is experiencing a large amount of moss in several of the canals. In some areas the moss is restricting water flow causing low water pressure and plugging pump stations and agricultural weir boxes.

The District is continuing to treat the canals with chemicals to reduce the moss growth and to kill what already exists. The District will be making extra patrols to clean weed screens and pump station filters. The District is also asking all customers to clean their personal filters on a regular basis.

If you have questions or need additional information, please call our Customer Service Department at 509-586-9111 or visit our web site at [www.kid.org](http://www.kid.org).
