Regarding: *Domestic water service in Elliott Lake area*

The Kennewick Irrigation District, a public quasi-municipal government, is the purveyor of domestic water services in the service area broadly called the Elliott Lake neighborhood. We are permitted to deliver water by the Washington State Department of Health through either a community well or by an intertie with the City of Kennewick.

For the past couple of years, we have been reselling City of Kennewick water using the intertie. Their water quality report is available on our website for the Elliott Lake users. We have also provided an area map including the parcels served and a copy of the operating permit.

If there are any questions about domestic water service in the Elliott Lake neighborhood, please call our Customer Service Department at 586-9111 at ask to be connected to a lead engineer or our District Manager who can assist you with more information.

Sincerely,

Kennewick Irrigation District
